THE PITCH

Short matches. A home you keep for months.

CORE DUEL

60–90 second 1v1 PvP. Shoot a glowing Core into the rival’s Reactor. Pure skill: no health bars, no damage, no stats to buy.

UNDERGROUND BASE

Dig a bunker floor by floor, run rooms, send expeditions, rescue survivors. The slow, cozy loop that brings players back every day.

CORE DUEL

Easy to read in one second, hard to master

Score a CORE STRIKE

Shots move only the Core. Most strikes in 60–90 s wins; ties go to LAST CHANCE.

A growing arsenal

Pistol, Shotgun, Sniper, Magnet today; SMG, assault rifle, bazooka and more to come.

Physical, not violent

Push, jump over, get stunned by the Core. No health, no killing.

THE UNDERGROUND BASE

Going deeper means exploring the world

Build and dig

Farms, reactor, Core Lab, Salvage Bay. Each new depth reveals rooms and lore.

Survivors at work

Assign survivors to rooms for bonuses; they walk the base as animated puppets.

Expeditions

Timed runs bring back Scrap, Rares and Blueprints that unlock duel mods.

SURVIVORS

12 fighters, all playable: base workers by day, duelists by night

REX · Leader

SCAR · Weapons Specialist

BETO · Scavenger

BOLT · Electrician

BRUTUS · Heavy

ATLAS · Navigator

12 playable characters, all implemented and tested • plus 3 Guardians and The Warden as bosses • new survivors every season

PROGRESSION

10 arenas, from industrial ruins to an infernal fortress

Desert Ruins

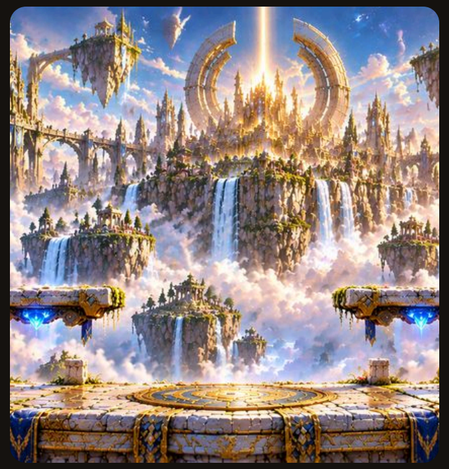

Frozen Citadel

Molten Citadel

Sky Temple Ruins

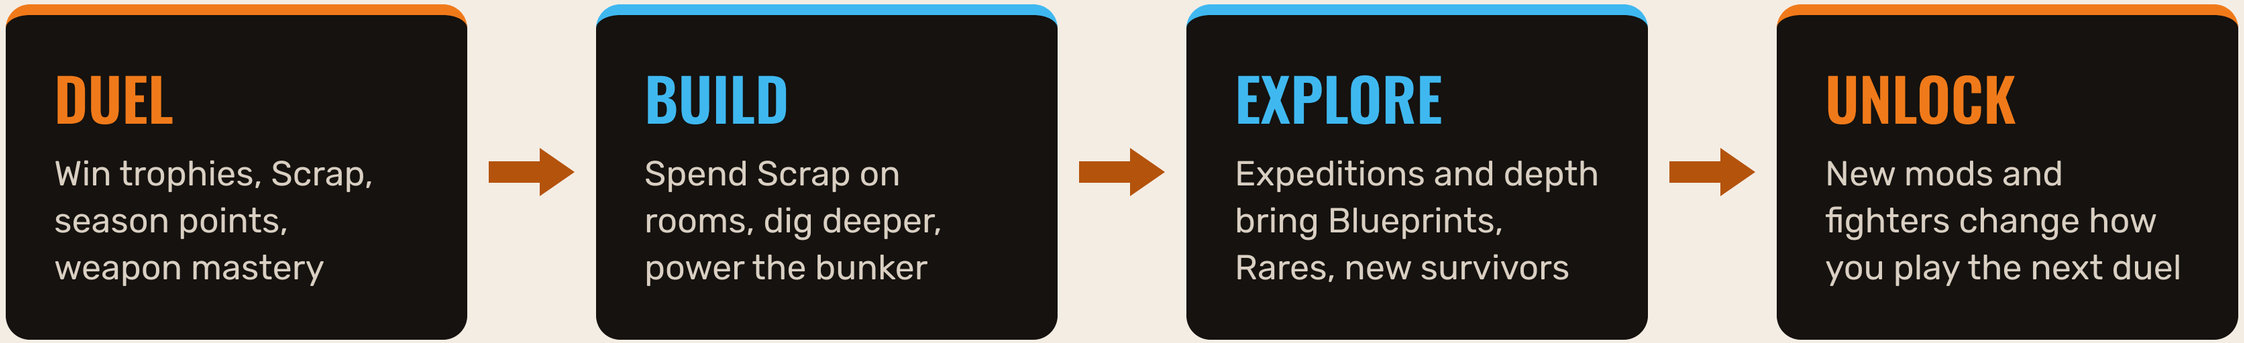

Celestial Ruins

Trophies unlock arenas with a cinematic fly-through. In the depths, **Guardians** and the final boss **The Warden** are fought with the same Core Duel rules.

CORE LOOP

Every match feeds the base; the base feeds the next match

Two ways up, neither mandatory: climb arenas through PvP, or grow the base through PvE. Base progress never adds duel stats; it adds **options**.
